#### 2. Презентация подготовленного монолога

#### Примерное содержание монологического высказывания:

*N*<sub>2</sub>1 My name is Kostya. My surname is Laznev. I was born in Moscow on the 23rd of June in 1981. I am a tall, thin boy. My hair is dark and short. My face is oval, my nose is straight. My eyes are large and brown. My friends say that I am a good-looking boy. I like to dress well. I usually wear black trousers, light shirts, clean boots. I had a dream to enter the Institute that's why I worked hard at school. We studied many subjects such as History, Russian, Physics, Geography and others. I was fond of English and Physics. And I was good at them. I want to get a good education and find an interesting and useful work. I think that I am honest, serious and polite.I have a hobby. I like to sing songs. My father likes singing too. He knows many good songs and we usually sing songs together. Nowadays young people don't like classical music. They prefer pop music. My parents invite me to some very good concerts of classical music. It is great. I am very grateful to my parents because now I begin to understand how wrong I was going only to pop concerts. I am proud of my mother and father. They are musicians. We like to spend our free time together. We often go to the museums, to the Concert Halls, to the theatres. I want to say that I respect my parents.

*N*₀2 My name is Natalia. My surname is Govorova. I am 15. I was born in 1982 in Chelyabinsk. I live in a small town of Usinsk in the Komi Republic. My address is Flat 116, 19, Pionerskaya Street. My phone number is 41-5-81. I am a student. I study at university. I do well in all subjects. They say, that I am a hardworking person. To tell the truth, all subjects come easy for me but sometimes I have to sit much, for example, to do asignments in Physics or Chemistry. My favourite subject is English. I spend much time on it reading books, doing tests etc. I'm sure, English is essential for my future

career. I like reading. I think comics and detective stories are much easier to read but I prefer to read novels - historical or up-to-date. I like music. My musical tastes are different, but it depends on my mood. But I think every apple is good in its season. I play the piano and the guitar, not seriously, but for my soul. Sometimes I like to listen to the Russian classical music. My favourite composers are Chaikovsky and Mozart. I don't like rock music, but I also like Russian folk songs. I have not much time to watch TV but sometimes I spend an hour or two watching an interesting film or a news program. In the evening I often read newspapers (our local ones) or magazines. I like fresh air and exercise. I'm sorry I have not much time for doing sports. But some aerobics in the morning, a swimming-pool twice a week, a ski-walk on a frosty day are of great help. Sport is fun. I have a wide circle of interests. I'm very sociable. I have many friends; most of them are my class-mates. We spend much time together, going out to the cinema or to the disco party, speaking about lessons and music, discussing our problems. But most of all I like my family. We all are great friends and deeply attached to each other. You see, it's me - a person with his good and not good characteristics, liking this and hating that. But it's interesting for me to live, to open new things.

#### Примерное содержание для построения монологов:

Family is very important for every person, because it gives you a sense of stability and tradition, a feeling of having support and understanding. You feel secure when there's a family behind you. They are people you can trust and rely on, people who won't let you down and who share your joys and sorrows. In happy families parents are frank and honest with their children, they treat their children with respect without moralizing or bossing them, and children in their turn learn how to treat other people and how to form relationship with their peers.

I enjoy the honest and open relationship in my family. I like it when parents trust their children, give them enough freedom and respect them. I think these things make family relations warm and pleasant. There is no so-called "generation gap" in our family, though we may argue and disagree on certain issues. I can always bring my friend home and my parents are very positive about it, although they don't always approve of our tastes, views and clothes.

I guess, when people spend more time together they are closer to each other.

We have some family traditions. But to my mind we haven't got anything special or original in our family. All our family traditions are connected with some holidays. Apart from national holidays there are family holidays like birthdays, weddings and anniversaries. A birthday is always a happy event in our family. On these days we usually have a party. Friends and relatives come with flowers and gifts and a festive dinner is served with plenty of delicious food to eat. Afterwards the guests either dance or sing, listen to music or just chat. One more family tradition is spending summer holidays together either at the seaside or in the country, which I enjoy very much. I'd like to become more independent from my parents in future, nevertheless we'll always be the best friends because my parents are the most important people in the world.

My parents are the most important people in the world. You know, my parents and I are usually very busy during the weekdays and we seldom have a chance to spend time together. Sunday is the day when we can sit at a table and talk over everything that happened during the week. Eating together makes us feel close and we often have our most useful conversations at these times. Almost every weekend we visit our grandparents, sometimes we visit my uncle (aunt) and his family.

Also once a week my parents give the flat a big clean. Of course I help them with it. By the way it's not so boring. I turn on music and we even have fun. Then we may go shopping together. I like to go shopping with my parents because they always buy me something. During our shopping rounds we discuss a lot of things and make plans for the next weekend.

My favourite tradition is to celebrate the New Year. It's a special holiday with its charm and surprises. We give presents to each other, go for a walk together, visit our grandparents and family friends.

I think we are old enough to realize that adults are not saints and may make mistakes and that the so-called generation gap should not spoil our relations. Good children are prepared to compromise and meet their parents halfway, render any possible help to their parents, treat their parents in the way they would like to be treated themselves.

So first of all I can advise for anyone to try to understand the feelings of your parents and show respect to them. Even if you don't agree with their thinking, try to make them understand politely, don't use harsh words with them which may hurt. It's important to celebrate your parents' and grandparents' birthdays. It will make them realize that you care for them.

To tell you the truth, I don't often spend time together with my family on weekdays. But on Sunday we try to organize something to have time for each other. We visit our grandparents and friends, go shopping, go for a walk or just eat out.

In summer we often go somewhere together to the seaside or to the country. I like such holidays because usually we have a lot of fun.

N $oldsymbol{o}1$  **The public educational system in Russia** includes pre-schools, general schools, specialized secondary and higher education. So-called pre-schools are kindergartens in fact. Children there learn reading, writing and maths. But pre-school education isn't compulsory - children can get it at home. Compulsory education is for children from 6(7) to 17 years of age. The main branch in the system of education is the general schools which prepare the younger generation for life and work. There are various types of schools: general secondary schools, schools specializing in a certain subject, high schools, gymnasia and so on. The term of study in a general secondary school is 11 years and

consists of primary, middle and upper stages. At the middle stage of a secondary school children learn the basic laws of nature and society at the lessons of history, algebra, literature, physics and many others. After 9th form pupils have to sit for examinations. Also they have a choice between entering the 10th grade of a general secondary school or going to professional school. Pupils who finish the general secondary school, receive a secondary education certificate, giving them the right to enter any higher educational establishment. One has to study in the institute for 5 years. Higher educational institutions train students in one or several specializations.

 $N_{2}$ 2 Education in Britain developed by steps. The first step was the introducing of two kinds of school: grammar schools and secondary modern schools. Grammar schools offered a predominantly academic education and in secondary modern schools education was more practical. The second step was the introducing of a new type of school, the comprehensive, a combination of grammar and secondary modern, so that all children could be continually assessed and given appropriate teaching. These schools were co-educational and offered both academic and practical subjects. However, they lost the excellence of the old grammar schools. Then after 1979 the greatest reforms in schooling were introduced. They included the introduction of a National Curriculum making certain subjects, most notably science and one modern language, compulsory up to the age of 16. The National Curriculum aims to ensure that all children study essential subjects and have a better all-round education. Pupils' progress in subjects in National Curriculum is measured by written and practical tests. More ambitious pupils continue with very specialized studies in the sixth form. They remain at school for two years more. Pupils sit for exams leaving secondary school and sixth form. They sit for the General Certificate Secondary Education at the end of the 5th-years' course. A-level or AS-levels are taken after two years of study in the sixth form. They are the main standard for entrance to university or other higher education. Some parents prefer to pay for their children to be educated at independent schools. This private sector includes the so-called public schools, some of whose names are known all over the world, for example Eton. It provides exceptionally fine teaching facilities, for example in science, languages, computing and design. Its students are largely from aristocratic and upper-class families. The Government's vision for the education system of the 21st century is that it will neither be divisive nor based on some lowest denominator. Diversity, choice and excellence will be its hallmarks in this century.

# $N_{\odot}3$ After taking GCSE (General Certificate of Education) exam young people can take three ways:

- 1. They can continue their academic education in the sixth form & get GCE-A Level (General Certificate of Education Advanced level) and then enter the university they have chosen (The most popular way in Britain)
- 2. They can continue studying in a college, where they choose any practical course and get a diploma NVA (National Vocation Qualification) or S VA in Scotland. After that they can start working.
- 3. Mixed type education. Young people can get General National Vocation Qualification (GNVQ) or GSVA in Scotland and then they can start practical work or enter a university as well

After that the education is considered to be higher. To get higher education young people go to the institute or college & after 3-4 years of studying they'll get Bachelor-degree and if they study 1-2 years more – Master degree.

| 4. The    | fuse must be p    | laced in every circuit where th | ere is a danger of | the line. |
|           | a) loss           | b) downloading                  | c) overloading     |           |

# Task 2. Say whether the following statements are true (T), false (F):

- 1. There should be fuses in any circuit.
- 2. A wire becomes hot when there is no current flowing through it.
- 3. A typical example of a series circuit is a wire.
- 4. If the circuit is opened the current slops everywhere.
- 5. The short circuit is produced when the current is allowed to return to the source of supply with control and with doing the work that is wanted to do.

#### *Variant 2.*

#### Task I. Choose the right statement and complete the following sentences.

- 1. Semiconductor is a material having...
  - a) an electrical conductivity
  - b) an electrical conductivity between that of metals and resistors
  - c) an electrical conductivity between that of metals and insulators
- 2. Semiconductors depend in many cases on ... for their unique properties.
  - a) crystals
  - b) crystal imperfections
  - c) imperfections

- 3. A criterion commonly associated with semiconductors is ...
  - a) negative temperature
  - b) a negative temperature coefficient of resistance
  - c) a coefficient of resistance
- 4. Semiconductors are of practical ... in a number of connections .
  - a) device
  - b) importance
  - c)conductivity

### Task 2. Say whether the following sentences are true (T) or false (F).

- 1. All materials show conductivity.
- 2. The use of semiconductors is limited.
- 3. Insulators work under any conditions as semiconductors.
- 4. Among the most investigated and best understood of semiconductors are germanium and silicon.
- 5. Semiconductors are of practical use in all types of connections.

- 1. The higher is the offered resistance the greater are the heating losses in electric wires.
- 2. The temperature dependence of the conductivity of semiconductors is one of the most striking and characteristic of their properties.
- 3. When a short circuit causes more current the wire becomes hot.
- 4. If the current flow is too great, a fuse is to be used as a safety device to stop the current flow. *Вариант 2*

### Переведите предложения:

- 1. The parallel circuit provides two or more paths for the passage of current.
- 2. The short circuit often results from cable fault or wire fault.
- 3. It is quite possible to reduce the current by employing transformers.
- 4. The longer is the wire, the greater is its resistance to current flow.
- 3.2. Контрольная работа (Условные предложения)

Variant 1.

#### Task 1. Translate the following sentences.

- 1. If a silver wire could be used, it would offer less resistance than an iron one.
- 2. If it were not for lasers, a great number of technological developments would not have taken place.
- 3. If thin wires had been used in this device, the wires would have melted.

#### Task 2. Rewrite the following sentences using.

- 1) Conditional II, 2) Conditional III
- 1. If I am too busy, I shall go to the concert.
- 2. If he doesn't come in time, shall we have to wait for him?
- 3. If you put on your glasses, you will see better.
- 4. Will you be very angry if we don't come?

Variant 2.

#### Task 1. Translate the following sentences.

- 1. If the potential difference became great enough, the electrons would jump through the air forming an electric spark.
- 2. The current would be alternating if the electromotive force were alternating.

3. If the operators had used some additional components, they would have been able to actuate the relay.

# Task 2. Rewrite the following sentences using.

- 1) Conditional II, 2) Conditional III
- 1. They will be surprised if I make such a mistake.
- 2. If no one comes to help, we shall be obliged to do the work ourselves.

#### Task 3. Make up all possible questions to this sentence:

A direct current flows continuously through a conducting circuit in one direction only.

#### Task 4. Translate the sentences paying attention to Participle I and Participle II.

- 1. Thermal energy generated in the reactor is transformed directly into electrical energy.
- 2. A metal wire carrying a current will be at a higher temperature.

#### Task 5. Read the following text and say what it is about. Entitle the text.

Volta was born in Como, Italy, on February 18, 1745. For some years he was a teacher of physics in his home town. Later on he became professor of natural sciences at the University of Pavia. After his famous discovery he traveled in many countries, among them France, Germany and England. He was invited to Paris to deliver lectures on the newly discovered chemical source of continuous current. In 1819 he returned to Como where he spent the rest of his life. Volta died at the age of 82.

Variant 2.

#### Task 1. Put the infinitive into the proper form of the verb (Active or Passive):

- 1. If the circuit (to break) the current (to stop) everywhere.
- 2. There (to be) various kinds of electric circuits.
- 3. The parallel circuit (to provide) two or more paths for the passage of current.
- 4. When a short circuit (to cause) more current to flow the wire (to become) hot and (to set) fire to the insulation.

# Task 2. Complete the sentences choosing the correct voice of the verbs in the parentheses.

- 1. As the temperature (is risen, rises), the degree of ionization of the donors (is increased, increases).
- 2. The reason for the drop (is lied, lies) in the temperature dependence of the mobility.

### Task 3. Make up all possible questions to this sentence:

A high voltage is essential for the economic transmission of electric power.

**Task 4.** Translate the sentences paying attention to Participle I and Participle II.

- 1. The current flowing along wires consists of moving electrons.
- 2. The heat produced per second depends both upon the resistance of the conductor and upon the amount of current carried through it .

#### Task 5. Read the following text and say what it is about. Entitle the text.

A great step forward in the scientific study of magnetism was made by Gilbert, the well-known English physicist (1540-I603). He carried out various important experiments on electricity and magnetism and wrote a book where he put together all that was known about magnetism. He proved that the earth itself was a great magnet.

Reference must be made here to Galileo, the famous Italian astronomer, physicist and mathematician. He took great interest in Gilbert's achievements and also studied the properties of magnetic materials. He experimented with them trying to increase their attracting power. One of his magnets, for example, could lift objects weighting 25 times its own weight.

- 1. The energy lost in the capacitor appears in the form of heat being generated in the dielectric.
- 2. The generators constructed at the plant have no commutators.

**Task 4.** Find out which -ing and -ed forms are parts of the predicates and which are participles.

- 1. Water-turbine plants are called hydroturbines.
- 2. The transmission system selected for everyday use is based on the combined activity of telecommunication and computers.
- 3. Switch board is an assemblage of controlling and indicating devices mounted upon a frame.
- 4. Nuclear fuel is undergoing nuclear fission.

**Task 5.** Use Participle I, Participle II or the Gerund of the verb in brackets and translate the sentences.

- 1. (Cool) an electric conductor results in its reduced resistance to electric current.
- 2. What is the name of an (insulate) material (use) to prevent an electric shock?
- 3. Solar energy has been converted into electricity by (use) solar cells, which are semiconductor devices (produce) from thin slices of silicon.

Variant 2

**Task 1.** Underline the infinitive in the sentences. Define its function. Translate the sentences.

- 1. To reduce the power losses, thick wires should be used.
- 2. At least 90 per cent of electric energy to be generated at present is a.c.
- 3. Gas turbines can be started within minutes, while steam plants may require hours to be put into operation.

**Task 2**. What forms of infinitive are used in the Infinitive Complexes given below – Complex Subject or Complex Object?

- 1. Every battery is known to possess two terminals.
- 2. The capacity of generating units was said to have been doubled.
- 3. Ebonite, rubber and glass are considered to be good insulators.

**Task 3**. Copy the sentences below and underline participles. Find out what forms of participles are used. Translate the sentences.

- 1. The code widely used is called Morse code.
- 2. While passing through the conductor, resistance results in the production of heat.

**Task 4.** Find out which -ing and -ed forms are parts of the predicates and which are participles.

- 1. The measures discussed are to be used for determining the faults in the conducting wires.
- 2. Being a semiconductor, germanium is widely used in transistors.
- 3. The data obtained formed the basis for further activity.
- 4. Water power is being used to drive a dynamo.

**Task 5.** Use Participle I, Participle II or the Gerund of the verb in brackets and translate the sentences.

- 1. The (apply) technique brought about quite unexpected results.
- 2. Mica is used as a dielectric due to ( have ) high voltage strength.
- 3. The worlds first tidal power station, a plant on the Rance river in France, began (operate) in 1966.
